ACERO FOUR-STAGE KNIFE SHARPENER

When you need to sharpen standard or Asian style knives, look no further than this one tool for the job. Designed for the commercial kitchen, the wide, rubberized base provides stability for any busy chef to sharpen their favorite knife.

- For either standard or Asian style knives; coarse stages quickly sharpen dull knives, while fine stages hone to a razor sharp edge
- Reduced wobbling - the safest sharpener with oversized non-slip base
- Most ergonomic handle available for comfort, slip-resistance and excellent grip control

INDUCTION READY ALUMINUM COOKWARE

Hybrid technology bonds a stainless steel plate to aluminum cookware, as effective in utilizing induction technology as full stainless steel cookware.

- Deep drawn 3003 Aluminum body is durable and highly conductive, better than stainless steel cookware for quickly and evenly distributing heat
- Stainless steel bonded plate allows for magnetic contact with induction cooktops
- Thicker handles and heavier rivets than standard cookware allow for secure comfort in transporting cookware
- Can also be safely used with gas or electric ranges

Edges of the non-slip feet help prevent boards from sliding when stored upright without racks

STATIK BOARD™ CUTTING BOARDS

The patented original design of STATIK BOARD™ puts safety first with molded-through, non-slip feet that prevent slipping & sliding, even on wet countertops. Rubberized sides of the board help maintain an upright storage position without sliding. They hold firm, are sturdy, and the fully-rubberized hook makes them easy to store and transport.

- Built-in hook for easy transport and hygienic storage
- Rubberized feet grip flat surfaces; rubberized sides keep the board upright without sliding
- Available in three (3) popular sizes
- HACCP color-coding system to minimize cross-contact
- Tough board surface reduces knife dulling; durable co-polymer prevents warping
- Dishwasher safe
